GO! ENGAGE | MYTHS/LEGENDS

Roar!
The sound shakes the ground.
Chan's heart races.
He looks to the mountain.
That is where the beast lives.

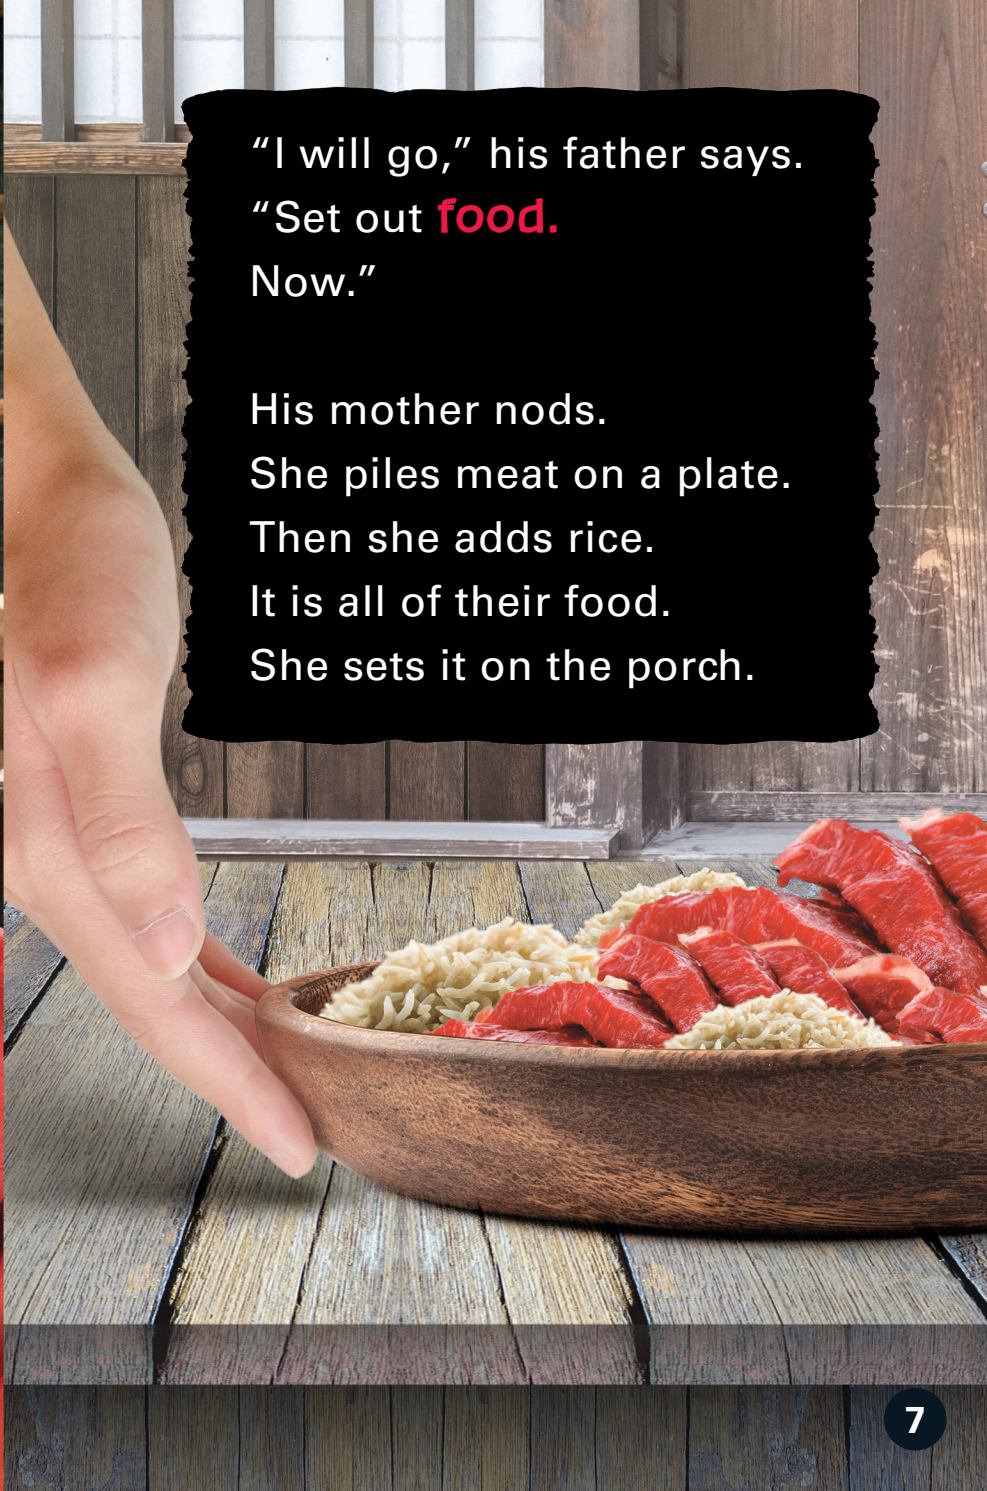
It is New Year's Eve.
The end of winter is here.
There is little food.
The beast starves.
So he hunts.
Chan runs home.
"Did you hear it?"

“Yes,” his father says.
“Come inside.
Hurry.”

His mother looks around.
“Where is Bo?”

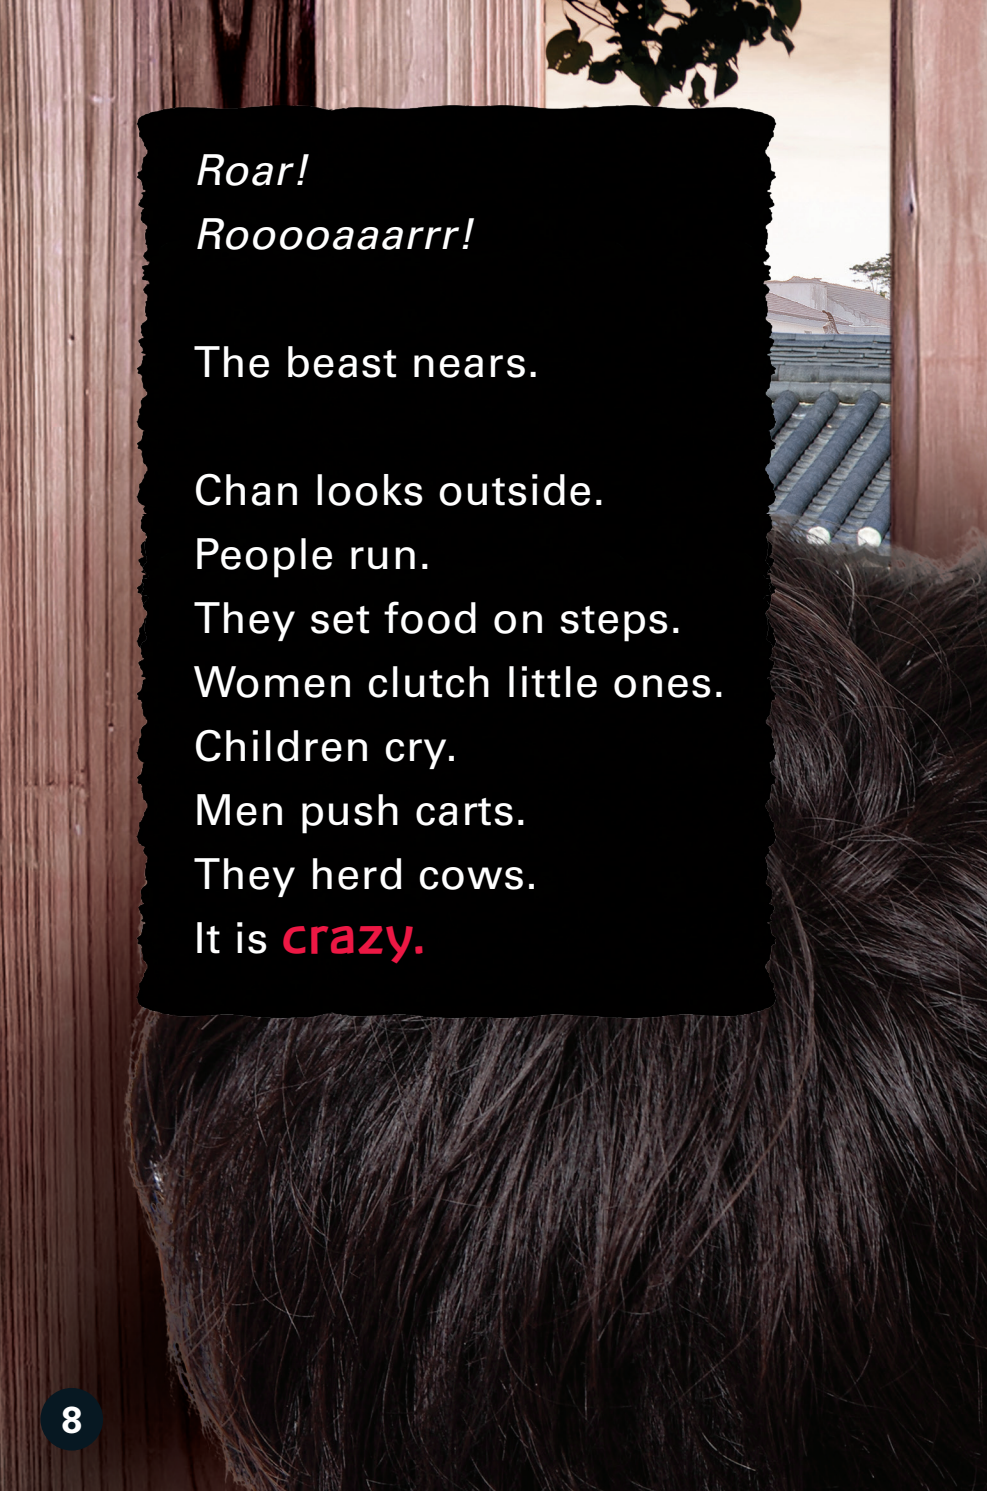
Bo is Chan’s sister.

“I saw her,” Chan says.
“She was with the hens.”



"I will go," his father says.
"Set out **food.**
Now."

His mother nods.
She piles meat on a plate.
Then she adds rice.
It is all of their food.
She sets it on the porch.



Roar!
Rooooaaarrr!

The beast nears.

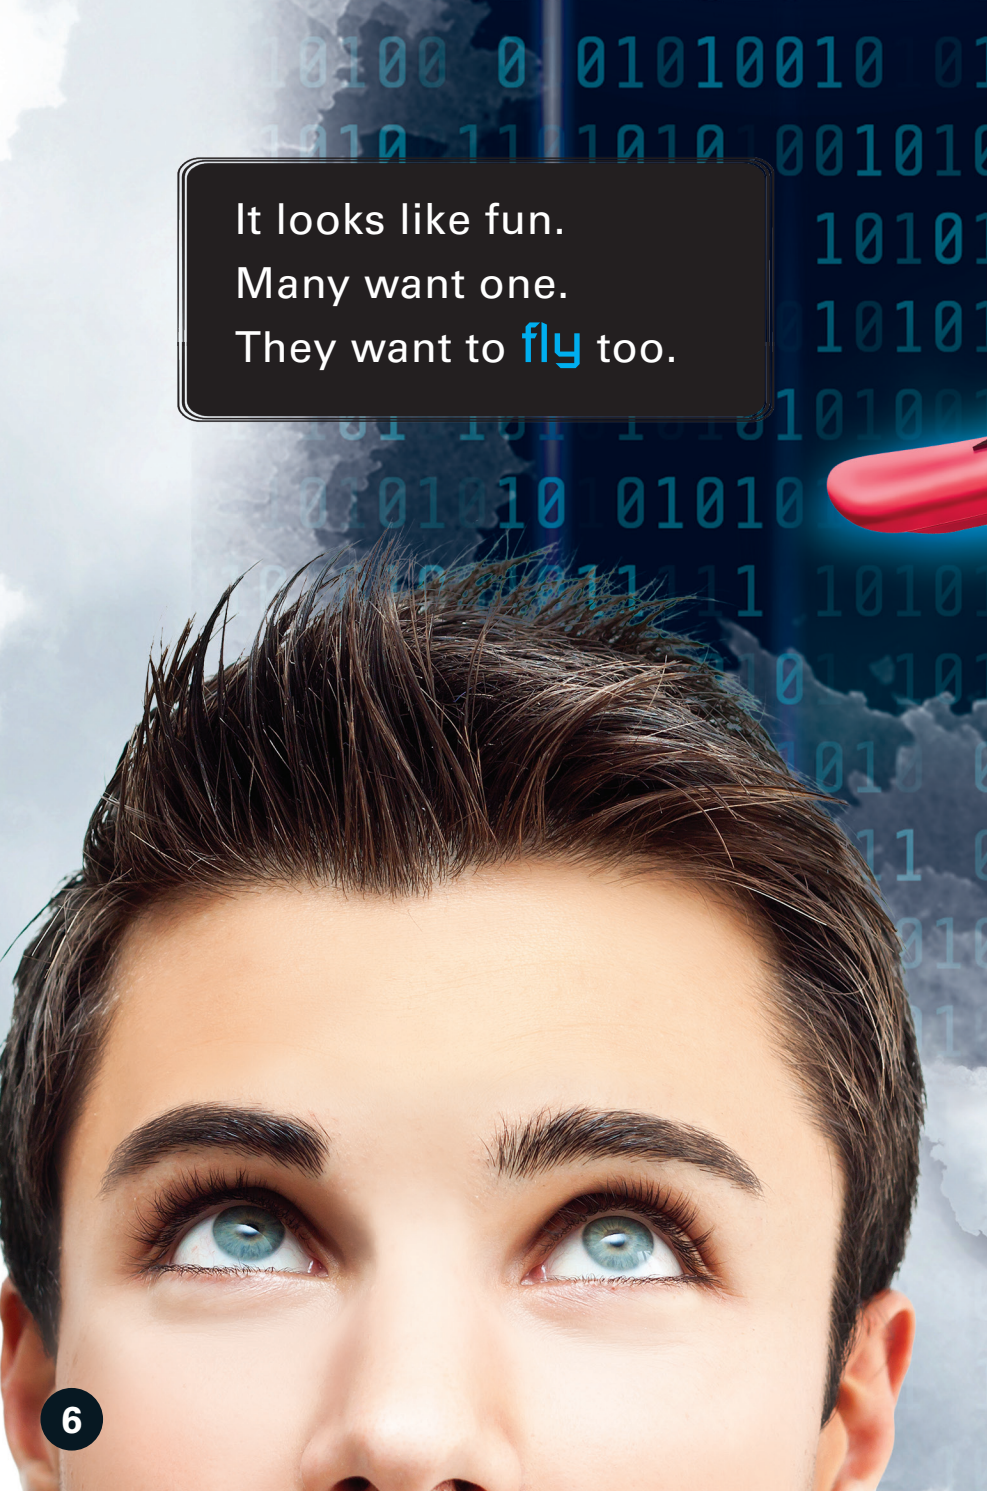
Chan looks outside.
People run.
They set food on steps.
Women clutch little ones.
Children cry.
Men push carts.
They herd cows.
It is crazy.

GO! ENGAGE | TECHNOLOGY NF
hover

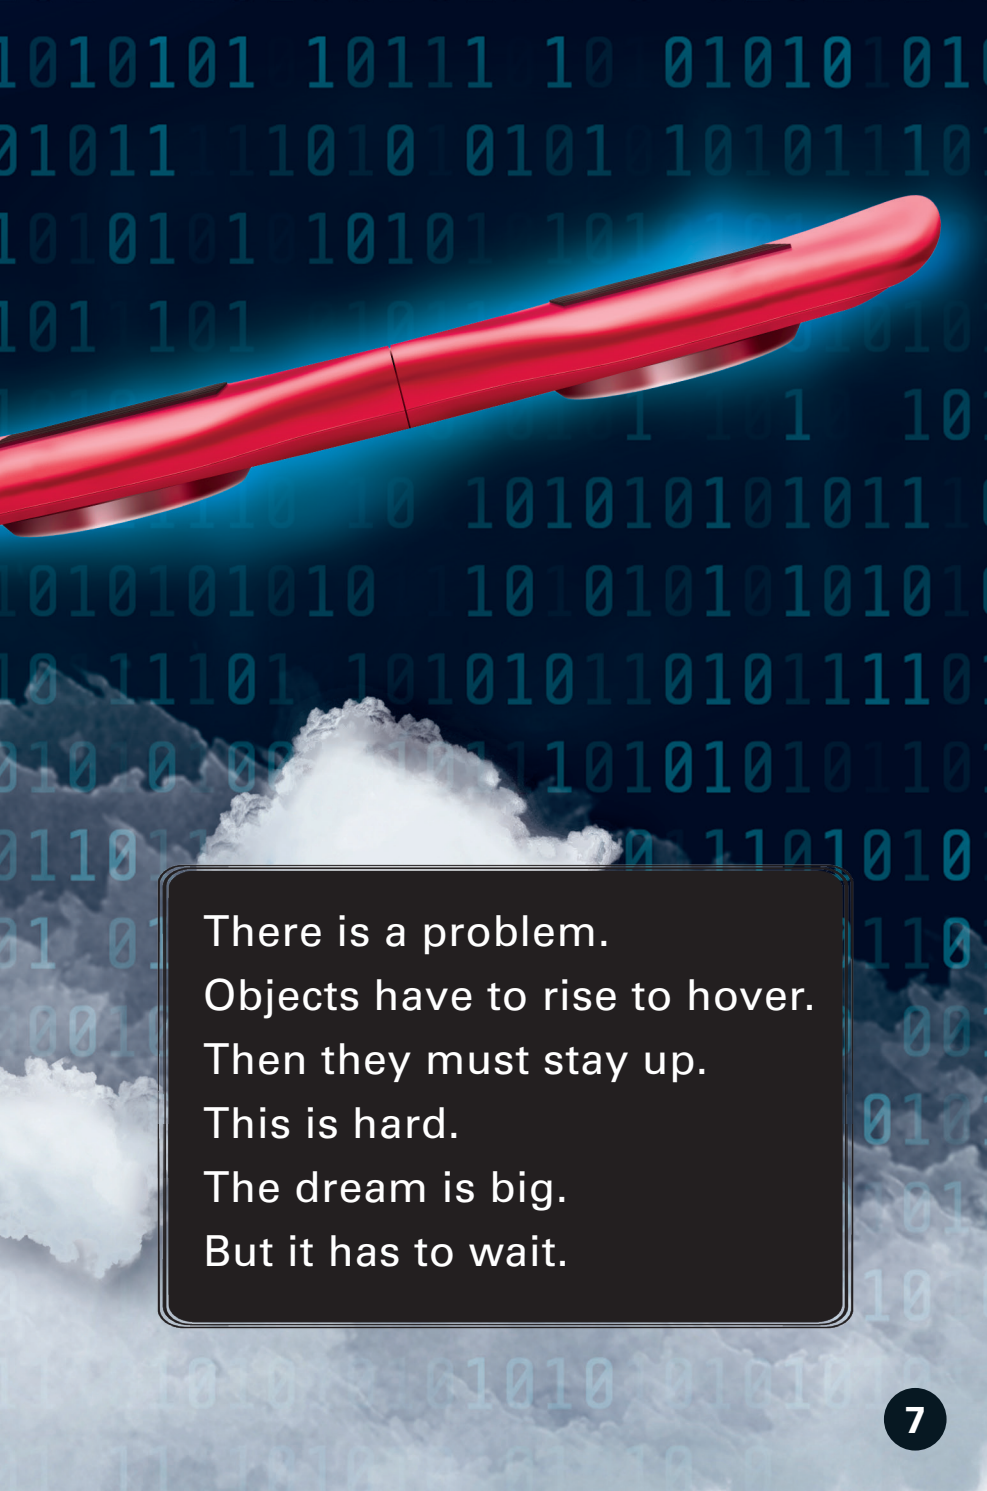
The year is 1985.
A movie comes out.
It is *Back to the Future.*
A boy rides a board.
His name is Marty.

This board is fast.
It stays just above the ground.
But it does not touch.
The board hovers.

It looks like a skateboard.
Marty rides it like one.
It flies over things.
Water does not stop it.
But it is not real.
This is just a movie.



It looks like fun.
Many want one.
They want to fly too.



There is a problem.
Objects have to rise to hover.
Then they must stay up.
This is hard.
The dream is big.
But it has to wait.

Years pass.
It is the early 2000s.
People work on this.
They use what they have.
Leaf blowers work.
These give lift.

A base comes next.
Some use surfboards.
These go up.
But rides are short.
They do not zoom.
It is very clumsy.
This is not like the movie.
